

# Micellized Vitamin D3 Liquid

## Clinical Applications

- Supports Bone and Dental Health\*
- Supports Modulation of Immune Function\*
- Supports Musculoskeletal Comfort\*

*This formulation supplies naturally derived vitamin D<sub>3</sub> micellized into extremely small droplets for easy absorption into the bloodstream. Provides 400 IU per drop making it suitable for infants, children, or adults.*

All Omnivits Formulas Meet or Exceed cGMP Quality Standards

**Micellized Vitamin D3 Liquid** is a natural form of Vitamin D in a water-soluble micelle form. Micellization greatly increases the solubility, absorption and bioavailability of our vitamin D3 over oil or emulsified forms.\* The micellization process produces tiny droplets (micelles) that are then formed into highly absorbable aggregate structures.\*

### Benefits of Vitamin D

Throughout our lifecycle, vitamin D assists with proper bone health, as it regulates our body's calcium levels. When calcium levels are low, vitamin D stimulates calcium absorption and reduces calcium excretion, thereby encouraging the maintenance of healthy bones and teeth. During childhood vitamin D assists with normal, healthy bone growth and during adulthood vitamin D assists with maintaining bone density.

In addition, vitamin D aids the immune system by helping to support the body's natural response to fight off illness. Healthy prostate, colon and breast tissue are also supported by vitamin D.

<b>Supplement Facts</b>		
Serving Size 1 Drop		
Servings Per Container 600		
Amount Per Drop	% Daily Value	
Vitamin D <sub>3</sub> (as cholecalciferol)	10 mcg	50%

K-MCD/171010.06
